Soumya Ranjan Padhi

Rayagada, Odisha (PIN-765001)
+91 7205574037 soumyaranjanpadhi936@gmail.com linkedin.com/in/srpadhi

Career Objective

To build a research-driven career in technology where I can apply analytical thinking, innovation, and problem-solving skills to address real-world challenges and contribute meaningful technological solutions for society.

Education

GIET University, Gunupur – B. Tech in CSE (AI-ML) **September 2024 – Present**
Sri Chaitanya techno School, Rayagada – +2 Science **April 2022 – April 2024**

Skills

Languages: Python, PHP , R, C, SQL, HTML, CSS
Frameworks Libraries: Laravel (PHP Framework), NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, OpenCV, TensorFlow
Tools: MySQL, VS Code, Google Cloud Platform, GitHub
Coursework: Artificial Intelligence (AI), Machine Learning (ML), Computer Vision, Internet of Things (IoT), Robotics, Data Science, Intelligent Systems, DBMS,
Soft Skills: Communication, Leadership, Adaptability, Problem Solving, Analytical Thinking, Teamwork
Core Skills: Content Review, Quality Assurance, Analytical Thinking, Attention to Detail, Decision Making

Experience

3SD Solution **May 2025 – July 2025**
Software Development Intern *onsite*

- Worked on web application development using PHP and SQL database integration. Implemented backend functionalities, data handling, and system logic for scalable applications.
- Collaborated with the team to debug, test, and deliver reliable software solutions within project deadlines.

Projects

Multi-Coordinate Autonomous Rescue Bot | *Raspberry Pi, Python, IoT Sensors, Robotics*

- Developed an autonomous rescue robot capable of navigating multiple coordinates in disaster environments for search and rescue operations.
- Utilized sensor-based detection systems to identify obstacles, objects, and possible human presence during missions.
- Enabled the robot to analyze environmental data and independently determine optimal navigation paths for efficient rescue tasks.

Smart Glove for Sign Language Conversion | *Python,ML,IoT Sensors*

- Designed a smart glove system that converts sign language gestures into real-time speech output, enabling easier communication for hearing and speech-impaired individuals.
- ntegrated Flex sensors, MPU6050 motion sensor, and pressure sensors with ESP32 to detect finger bending, hand orientation, and gesture patterns..
- Implemented an offline audio output module with a speaker to translate recognized gestures directly into spoken words without internet dependency.

Leadership / Extracurricular

- **Event Coordinator – Data Science Club**: Organized hands-on workshops for 500+ students, guided peer learning, and led sessions on machine learning and data visualization.
- **Research Team Member – Student Association of Robotic Science (SARS)**: ontributed to robotics research initiatives, technical discussions, and project development within the organization.

Certifications/Achievements

- 1st Prize – Maze Solver Competition, IIT (ISM) Dhanbad
- 3rd Prize – Maze Solver Competition, IIT Hyderabad
- 1st Prize – Robo Sumo And Death Race Competition, [Your College Name] (Consecutive 2 Years)
- Participated in Robotics Events and Hackathons at IIT Hyderabad, IIT Kharagpur, IIT Bhubaneswar, IIT (ISM) Dhanbad, and NIT Rourkela
- AI Machine Learning Workshop – IIT Bhubaneswar
- Data Science with Python - Simplilearn
- 5-Star Python Coder on Hackerrank
